

AgriERP

Folio3 State of the art Agriculture ERP Solution

MANAGER

- Create and manage work orders
- Approve/adjust attendance and breaks
- Assign responsible persons
- Create templates
- Modify farm planning
- Manage harvest orders
- Approve field progress adjustments,
- Control user permissions and roles
- Manage attributes

SUPERVISOR

- Start and end work orders for self and others
- Clock in and clock out other users
- Assign and adjust operators and farmhands
- Review and update field progress
- Generate harvest tickets
- Approve task completions
- Switch users and machines from mobile
- Participate in multiple active work orders simultaneously
- Assign or remove responsible persons

RESPONSIBLE PERSON

- Single designated person per work order
- Enter progress updates
- Clock in and clock out assigned resources
- Add or remove team members and machinery
- Start work orders without clocking in
- Maintain task accountability
- Add or remove team leads

MACHINE OPERATOR / FARM HAND

- Clock in and clock out for attendance
- Start assigned jobs
- Add progress updates
- Record material consumption
- Pause and resume jobs
- Mark task completion
- Use chat feature
- Create observations and points of interest

Terminologies

- Tasks
 - Machine
 - Implement
 - Field
 - Crop
 - Tank Mixing
- Season
 - Machine
 - Implement

Tasks

Terminologies

English Term	Urdu Meaning	Brief Explanation
Almond Preparation	بادام کی تیاری	Work related to preparing almond orchards or almond production
Insect/Disease Control	کیڑوں اور بیماریوں کا کنٹرول	Treatment and control of pests and diseases that damage crops
Planting/Replant	شجرکاری / دوبارہ لگانا	Planting new plants or replacing damaged plants
Sampling	نمونہ لینا	Collecting soil, water, or crop samples for testing
Fertilization	کھاد ڈالنا	Using fertilizer to provide nutrients to plants
Irrigation	آب پاشی - فصلوں کو پانی دینا	Supplying water to crops
Pollination	پھولوں میں جرگ کی منتقلی	Transfer of pollen in flowers so fruit can develop

Tasks

Terminologies

English Term	Urdu Meaning	Brief Explanation
Soil Amending	مٹی کی اصلاح	Adding compost or organic matter to improve soil quality
Harvest	فصل کی کٹائی	Collecting mature crops or fruits
Land Preparation	زمین کی تیاری	Leveling and preparing land before cultivation
Pruning/Hedging	شاخ تراشی / بار کی تراش خراش	Cutting extra branches to improve plant growth
Weed Control	جڑی بوٹیوں کا کنٹرول	Removing harmful grass or weeds
Hulling & Drying	چھلکا اتارنا اور خشک کرنا	Removing shells/husks and drying almonds or grains
Orchard Floor Management	باغ کی زمین کی دیکھ بھال	Keeping orchard soil clean, level, and suitable for cultivation

Tasks

Terminologies

English Term	Urdu Meaning	Brief Explanation
Preharvest (PHI)	گٹائی سے پہلے انتظار کی مدت	The minimum number of days that must pass between the last pesticide application and harvesting the crop.
Re-entry (REI)	دوبارہ داخلے کی مدت	The minimum time workers must wait before safely entering a treated field after pesticide application.
Rainfast	بارش سے محفوظ ہونے کی مدت	The number of hours required after application for a pesticide to remain effective despite rainfall.
Stockfeed	مویشیوں کے چارے کے لیے انتظار کی مدت	The minimum number of days before treated crops or pasture can be fed to livestock.
Plantback	دوبارہ کاشت کی مدت	The waiting period before planting another crop in soil that has been treated with a pesticide or herbicide.
Grazing	چرائی کی مدت	The minimum number of days livestock must be kept off a treated pasture before grazing is allowed.

Tasks

Terminologies

English Term	Urdu Meaning	Brief Explanation
Infestation	بہتات	Large numbers of harmful organisms spreading and damaging crops, soil, grain, or livestock.
Water logging	زمین میں پانی بھر جانا	A condition where excess water accumulates in the soil, reducing oxygen for plant roots and harming crop growth.

Machine

A machine is a complete powered unit that can do work by itself.

Examples:

- Tractor
- Combine harvester
- Excavator

Implement

Farming tool attached to a machine (usually a tractor) to perform a specific agricultural task.

Examples:

- Plow → for tilling soil
- Sprayer → for spraying chemicals
- Seeder → for planting seeds

Field

Terminologies

A field is the piece of land where crops are planted and grown.

Crop

A plant cultivated by farmers for:

- food
- fiber
- animal feed
- commercial use

Tank Mixing

Combining two or more agricultural products in the same spray tank before applying them to crops or fields.

- Pesticides
- Herbicides
- Fungicides
- Fertilizers

A farmer mixes:

insecticide + fungicide + liquid fertilizer

in one spray tank and sprays the crop only once instead of three separate times.

Season

A specific time period in the year especially linked to weather or farming activities.

- Spring
- Summer
- Autumn/Fall
- Winter

Almond pollination occurs during the flowering season.

Observation/Point of Interest (POI)

- Core concept is monitoring against:
 - Pests/insects
 - water logging
- Only viewable by manager in mobile

The screenshot displays the AgriERP Work Orders interface. The top navigation bar includes links for Maps, Planning, Work Orders, Template Management, and Communication Center. The main content area shows a list of work orders under the 'Observations' tab. A table lists the following data:

Title	Farm	Plots	Category	Created Date	Created By	Actions
Honey Bee storm	Vann Farm	151	Pest or Insects Obser...	06/02/2026	Crop Planner	>

On the right sidebar, the 'Summary' section is visible, with a 'View' button (represented by an eye icon) highlighted by a red box. Below the summary, there are expandable sections for 'General' and 'Plots'.
