## Step 5A: Add Tank Mix Materials via Template

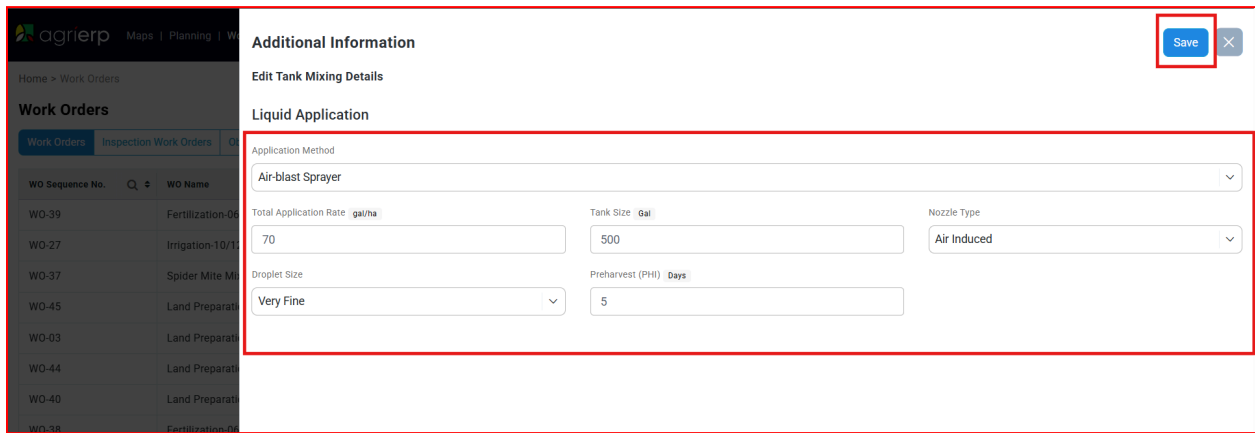

5A.1 Click on Material template dropdown field and select the relevant material template. (please refer [Create Material Template User Manual](#) for material template creation guide)

5A.2 The materials will be fetched in the Materials section and the tank mix additional information will appear on the right panel. You can change any material's Rate, Unit, Mix Method and Per if required. Additionally click on "Tank Mixing" on the right panel to view and edit (if needed) the additional tank mixing details.

5A.3 You can view the additional tank mixing information and update any field if needed. Click on Save after making the changes.

**Additional Information**

Edit Tank Mixing Details

**Liqud Application**

Application Method: Air-blast Sprayer

Total Application Rate: 70 gal/ha

Tank Size: 500 gal

Nozzle Type: Air Induced

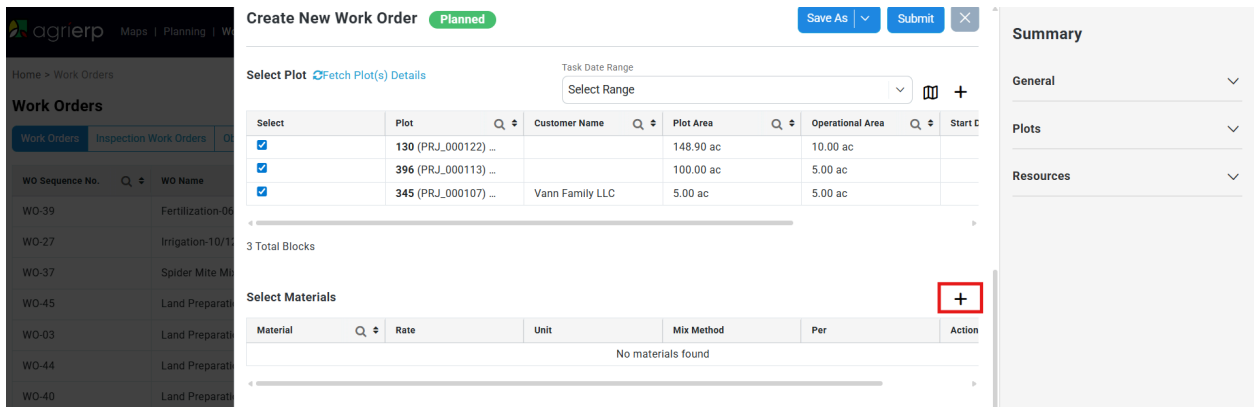

Droplet Size: Very Fine

Preharvest (PHI): 5 days

Save

\* Work order that is created on web is visible on mobile screen

## Step 8: Mark as Done

8.1 After ending the job in the mobile app, the user will return to the web application and click on "Work Order Completed" to finalize it.

8.2 Approve the work order

8.3 The status will then reflect as "Done"

The screenshot shows the agriERP interface with a "Work Order Completed" button in the top right corner. A modal dialog box titled "Approve this Work Order" is open, prompting the user to enter a description and approve the work order. The dialog box has an "Approve" button highlighted with a red border.
